INTERNATIONAL JOURNAL ON MUTAGENESIS, CHROMOSOME BREAKAGE AND RELATED SUBJECTS

MANAGING EDITOR: R.J. Preston, *Oak Ridge, TN*

EDITORIAL BOARD: C.S. Aaron, *Morristown, NJ*; A. Abbondandolo, *Pisa*; M. Alačević, *Zagreb*; J.W. Allen, *Research Triangle Park, NC*; Bruce M. Cattanach, *Harwell*; D.R. Davies, *Norwich*; B.J. Dean, *Sittingbourne*; L. Fishbein, *Jefferson, AR*; U. Graf, *Schwerzenbach*; H. Greim, *Neuherberg*; R.H. Haynes, *Toronto*; F. Hutchinson, *New Haven, CN*; S. Igali, *Budapest*; B. Kilbey, *Edinburgh*; M.L. Mendelsohn, *Livermore, CA*; E. Moustacchi, *Orsay*; G. Olivieri, *Rome*; R.B. Painter, *San Francisco, CA*; J.M. Parry, *Swansea*; H.S. Rosenkranz, *Cleveland, OH*; J. Schöneich, *Gatersleben*; F.H. Sobels, *Leiden* (*Chairman of the Board of Managing Editors*); T. Sugimura, *Tokyo*; J. Veleminský, *Prague*; G. Zetterberg, *Uppsala*

All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted, in any form or by any means, electronic, mechanical, photocopying, recording, or otherwise, without the prior permission of the copyright owner.

Submission to this journal of a paper entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

Special regulations for readers in the U.S.A. This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 21 Congress Street, SALEM, MA 01970 (U.S.A.). If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US$ 2.25, also payable through the Center. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

Special regulations for authors in the U.S.A. Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information under the U.S. Copyright Law.

Contents

Volume 104 (1982)

Genetic toxicology studies with 2-nitrobenzofurans and 2-nitronaphthofurans
by N. Weill-Thevenet, J.-P. Buisson, R. Royer and M. Hofnung (Paris) 1–8

Test-condition-dependent influence of harman and nonharman on benzo[*a*]pyrene mutagenesis in Salmonella
by M. Riebe, K. Westphal and H. Keller (Hamburg) 9–15

Contribution of 1-nitropyrene to direct-acting Ames assay mutagenicities of diesel particulate extracts
by Irving Salmeen, Anna Marie Durisin, Thomas J. Prater, Timothy Riley and Dennis Schuetzle (Dearborn) 17–23

Establishment of stochastic significance in Ames tests and its relevance to genetical significance
by I. de G. Mitchell (Harlow) 25–28

Absence of genotoxicity induced by ^{3}H and ^{14}C label in *Salmonella typhimurium* and *Bacillus subtilis*
by James M. Gentile, Sherri Gaff, Glenda J. Gentile, Steven Townsend, Jay C. Means and Michael J. Plewa (Holland, Solomons and Urbana) 29–33

Diurnal variations in the mutagenicity of airborne particulate organic matter in California's south coast air basin
by James N. Pitts Jr., William Harger, David M. Lokensgard, Dennis R. Fitz, Gina M. Scorziell and Victoria Mejia (Riverside) 35–41

The efficiency of various solvents in the extraction of chemical mutagens from living tissues: a comparative study
by M.A.J. Al-Mossawi, M. Kadri, M. Salama and A. Salem (Safat) 43–48

Mutagenicity and DNA-modifying activity of 2-nitropropane
by William T. Speck, LeRoy W. Meyer, Errol Zeiger and Herbert S. Rosenkranz (Cleveland and Research Triangle Park) 49–54

Increased sensitivity of *Escherichia coli* K12 to certain mutagens as a consequence of mutation leading to phage U3 resistance
by Jürgen Ellenberger (Freiburg i.Br.) 55–60

Mutagenicity of Nifurpirinol (P-7138) in *Escherichia coli* WP2 and *Salmonella typhimurium* TA100
by Yoshiyuki Nakamura, Haruo Fukushima, Isao Tomita and Ikuo Kimura (Shizuoka and Nagoya) 61–66

The adaptive response to alkylating agents
The removal of O^6-methylguanine from DNA is not dependent on DNA polymerase-1
by P. Karran, S. Stevens and B. Sedgwick (Brighton and London) 67–73

Heat mutagenesis of bacteriophage ΦX174 in SOS-induced bacteria
by Roeland M. Schaaper and Lawrence A. Loeb (Seattle) 75–78

The use of a yeast strain with a temperature-sensitive DNA ligase to estimate DNA repair after exposure to mutagens
by Richard S. Tippins, Raymond Waters and James M. Parry (Singleton Park) 79–86

Cytotoxic and mutagenic effects of neocarzinostatin in wild-type and repair-deficient yeasts
by E. Moustacchi and V. Favaudon (Orsay) 87–94

0165–7992/82/0000–0000/$02.75 © Elsevier Biomedical Press

Cytogenetic activities of 3 sulphonamides
by A. Badr (Tanta) 95–100
Extraordinary high micronucleus frequency induced by X-rays in a special clone of *Tradescantia reflexa*
by Te-Hsiu Ma, Tsungci Fang, Jialung Ho, Dengqin Chen, Ruluen Zhou, Guangheng Lin, Jixun Dai and Ji Li (Macomb and Qingdao) 101–103
Somatic and teratogenic effects induced by heliotrine in Drosophila
by N.G. Brink (South Australia) 105–111
Faillure of irradiated onion to induce sex-linked recessive lethal mutations in *Drosophila melanogaster*
by S. Mittler and M.I. Eiss (DeKalb and Hunt Valley) 113–115
Note on the utility of the *st mus302* test for chromosome loss in a blind test of an environmental compound for chromosome breakage in Drosophila
by S. Zimmering (Providence) 117–119
On the nature of partial losses of the Y chromosome from treatment of ring-X/$B^{S}Yy^{+}$ males with diethylnitrosamine (DEN) or procarbazine and matings with repair-deficient *st mus302* females of Drosophila
by S. Zimmering and K.L. Kammermeyer (Providence) 121–123
Inhibition of DNA synthesis accompanied by stimulation of protein synthesis in novobiocin-treated developing sea urchins
by William T. Speck, Pnina G. Rosenkranz and Herbert S. Rosenkranz (Cleveland) 125–130
Sister-chromatid exchange induction by *cis*-platinum/adriamycin cancer chemotherapy
by J.K. Wiencke, J. Cervenka, B.J. Kennedy, J. Prlina and R. Gorlin (Minneapolis) 131–136
Cytogenetic effects of epoxy, phenolformaldehyde and polyvinylchloride resins in man
by I.I. Suskov and L.A. Sazonova (Moscow) 137–140
Inducibility of sister-chromatid exchanges by heavy-metal ions
by Hisako Ohno, Fumio Hanaoka and Masa-atsu Yamada (Tokyo) 141–145
Induction of nuclear anomalies (micronuclei) in the peripheral blood erythrocytes of the eastern mudminnow *Umbra pygmaea* by ethyl methanesulphonate
by Ria N. Hooftman and W.K. de Raat (Delft) 147–152
A comparative study of the relative frequency and specific pattern of chromatid interchanges induced by mono-, di- and poly-functional alkylating agents
by D.L. Hayman (Adelaide) 153–158
A method for preparing chromosomes from peripheral blood of the mouse
by P.R. Barren, S.M. Morris, H. Schol and J.B. Bishop (Jefferson) 159–163
Short-term tests for transplacentally active carcinogens
Sensitivity of the transplacental micronucleus test to diethylnitrosamine
by R.J. Cole, Natalie Taylor, Jane Cole, Leigh Henderson and C.F. Arlett (Brighton) 165–171
Induction of specific-locus mutations in female mice by triethylenemelamine (TEM)
by Bruce M. Cattanach (Harwell) 173–176
Heritable translocation test in mice with triethylenemelamine (TEM) and ergotamine
by B.E. Matter (Basel) 177–182
Modulation of survival and transformation during plateau-phase holding of UV-irradiated mouse cells
by Gerald L. Chan and John B. Little (Boston) 183–186
Validation of a DNA-repair synthesis assay on pools of fresh and frozen-thawed lymphocytes
by E. Capelli, M. Stefanini, E. Giulotto and F. Nuzzo (Pavia) 187–191
A reduced capacity for unscheduled DNA synthesis in lymphocytes from individuals exposed to propylene oxide and ethylene oxide
by Ronald W. Pero, Tomas Bryngelsson, Bengt Widegren, Benkt Högstedt and Hans Welinder (Lund) 193–200

Mutagenic activity of non-volatile organic matter associated with suspended matter in urban air
by F. de Wiest, D. Rondia, R. Gol-Winkler and J. Gielen (Liège) 201–207
Mutagenicity of some methylated benzo[*a*]pyrene derivatives
by Regina Santella, Takashi Kinoshita and Alan M. Jeffrey (New York) 209–213
A marine host-mediated assay for the detection of mutagenic compounds in polluted sea waters
by Domenico Frezza, Bruna Pegoraro and Silvano Presciuttini (Venezia and Pisa) 215–223
Retinoids as inhibitors of *ortho*-aminoazotoluene-induced mutagenesis in the Salmonella/liver microsome test
by Leif Busk and Ulf G. Ahlborg (Uppsala and Stockholm) 225–231
Mutagens in larger fungi
II. The mutagenicity of commercial pickled *Lactarius necator* in the Salmonella assay
by O. Sterner, R. Bergman, C. Franzén, E. Kesler and L. Nilsson (Lund) 233–237
Some statistical aspects of spontaneous sex-linked recessive lethal mutations in Drosophila
by Elmar Gocke, Karl Eckhardt, Ming-Tzan King and Dieter Wild (Freiburg) 239–242
Anti-tumour alkylating agents act synergistically with methylxanthines on induction of sister-chromatid exchange in human lymphocytes
by D. Mourelatos, J. Dozi-Vassiliades and A. Granitsas (Thessaloniki) 243–247
Enhanced yield of chromosomal aberrations in human peripheral lymphocytes in vitro using contrast media in X-irradiation
by W. Hadnagy, G. Stephan and F. Kossel (Neuherberg) 249–254
Chromosomal aberrations induced by ethylene oxide in a human amniotic cell line in vitro
by V. Poirier and D. Papadopoulo (Paris) 255–260
Intercalating substances do not induce sister-chromatid exchanges (SCEs) in vivo
by Günter Speit (Ulm) 261–266
Effect of temperature variation on sister-chromatid exchange and cell-cycle duration in cultured human lymphocytes
by M.R. Abdel-Fadil, C.G. Palmer and N. Heerema (Assiut and Bloomington) 267–273
Lack of ultraviolet mutagenesis in radiation-resistant bacteria
by Philip R. Tempest and Bevan E.B. Moseley (Edinburgh) 275–280
Cysteamine protection of SCEs induced by UV and fluorescent light
by Martha Bianchi, Néstor Bianchi, Liliane Cortés and Miguel Reigosa (La Plata) 281–286
Quantitation of small colony trifluorothymidine-resistant mutants of L5178Y/TK$^{+/-}$ mouse lymphoma cells in RPMI-1640 medium
by Martha M. Moore and Barry E. Howard (Research Triangle Park) 287–294
DNA-repair deficiencies do not affect intercalator-induced cytotoxicity or DNA scission in human cells
by Leonard A. Zwelling and Michael R. Mattern (Bethesda) 295–304
Recovery from post-irradiation inhibition of DNA synthesis in an ultraviolet-sensitive mutant mouse cell
by Hiroko Hama-Inaba, Naoko Hieda-Shiomi, Tadahiro Shiomi and Koki Sato (Chiba) ... 305–309
Mouse spot tests with alkylnitrosoureas
by Tohru Shibuya, Tetsuro Murota and Kiyoshi Tutikawa (Hadano and Mishima) 311–315
Genetic analysis of an *N*-ethyl-*N*-nitrosourea-induced mutation at the hemoglobin β-chain locus in mice
by Tetsuro Murota, Tohru Shibuya and Kiyoshi Tutikawa (Hadano and Mishima) 317–321
The effects of post-treatments with caffeine during S and G_2 on the frequencies of chromosomal aberrations induced by thiotepa in root tips of *Vicia faba* and in human lymphocytes in vitro
by B.A. Kihlman, K. Hansson and H.C. Andersson (Uppsala) 323–330

Instructions to Authors 331
Investigation, with the Salmonella/microsome test, of psychopharmaceuticals used in meat production
by Angelika M. Preiss, Michael Scheutwinkel-Reich, Ingrid Fülle, Heidemarie G. Grohmann and Hans-Jürgen Stan (Berlin) 333–337
Investigation of the butyrophenone tranquilizer azaperone and its main metabolites with the Salmonella/microsome test
by M. Scheutwinkel-Reich, A.M. Preiss, I. Fülle, H.G. Grohmann and H.-J. Stan (Berlin) 339–344
Beef extract mutagens, and not liver S9, increase mutation frequency in the Ames test
by Piero Dolara (Florence) 345–346
Light induces mutagenicity of hair-dye *p*-phenylenediamine
by K. Nishi and K. Nishioka (Kyoto) 347–350
Arsenic-induced developmental defects and mitotic abnormalities in sea-urchin development
by Giovanni Pagano, Agostino Esposito, Patrizia Bove, Marialuisa de Angelis, Annamaria Rota, Evangelos Vamvakinos and G. Giacomo Giordano (Naples) 351–354
Induction of sister-chromatid exchanges in human lymphocytes by extracts of particulate emissions from a diesel engine
by J.M. Lockard, P. Kaur, C. Lee-Stephens, P.S. Sabharwal (Lexington), Michael A. Pereira, Lofton McMillan and Joan Mattox (Cincinnati) 355–359
3-Aminobenzamide synergistically increases sister-chromatid exchanges in cells exposed to methyl methanesulfonate but not to ultraviolet light
by William F. Morgan and James E. Cleaver (San Francisco) 361–366
The persistence of micronuclei in peripheral blood erythrocytes: detection of chronic chromosome breakage in mice
by Robert Schlegel and James T. MacGregor (Berkeley) 367–369
Genetic effects in the mouse of formaldehyde in combination with adenosine and hydrogen peroxide
by N. Fontignie-Houbrechts, J. and M. Moutschen-Dahmen, N. Degraeve and H. Gloor (Liège and Chêne-Bougeries) 371–376
Selection in HAT medium is not a reliable method for the study of reversion from 6-thioguanine resistance to sensitivity
by S. Bonatti, A. di Leonardo, L. Mariani, R. Randazzo and G. Sciandrello (Pisa and Palermo) 377–381
Mutations induced by γ-rays and fast neutrons in cultured mammalian cells. Differences in dose response and RBE with methotrexate- and 6-thioguanine-resistant systems
by Nori Nakamura, Shozo Suzuki, Akira Ito and Shigefumi Okada (Tokyo) 383–387
Mutagenicity of benzo[*a*]pyrene and the antioxidant phenol at the HGPRT locus of Chinese hamster cells
by Yu. V. Paschin and L.M. Bahitova (Moscow) 389–393
